# North Carolina Low Impact Development Summit

## ADVANCING THE NEXT GENERATION OF STORMWATER MANAGEMENT

---

### Join Us

You are invited to attend the North Carolina Low Impact Development (LID) Summit March 26-27, 2014 at the Raleigh Convention Center.

A committed partnership between the state, N.C. Coastal Federation, N.C. State University, development professionals, local governments and private engineering firms is engaged in developing new standards and tools to simplify the use of LID as a voluntary and cost effective option for stormwater management.

- Hear from national speakers, government leaders, research experts and development professionals on the emerging topic of LID.
- Learn about new LID tools, permitting options, and successful residential, commercial and public LID projects from across the state.
- Converse with local government leaders, development professionals and stormwater managers about ways to overcome impediments to implementing LID in your community.
- Get the latest information on LID from exhibitors, presenters and summit participants.

Visit the [Summit web page](#) for registration, agenda, sponsorship opportunities and additional information.

---
