

Helping Nature Help Us: Co-Benefits of Environmental Solutions

Burrows Smith
River Bluffs
Development Group

Burrows Smith grew up on Wrightsville Beach. Life along our waterways left him with a passion for conservation and an appreciation for how our natural surroundings contribute to the quality of life we all enjoy in southeastern North Carolina. Burrows has been active in the construction industry since 1980, after graduating from UNC Chapel Hill. He has been active on the Board of Coastal Conservation Association, and served on the North Carolina Marine Fisheries Board. Developments he worked on include Sea Watch at Kure Beach, Wrightsville Sound Office Park, Westbay, Plantation Landing and Sagewood. Most recently he and his partners have been developing River Bluffs, a 315+ acre development on the North East Cape Fear River. His development concept is simple, utilize the natural topography and attributes of the land.

Where is River Bluffs?

1100 Chair Rd.
Castle Hayne, NC 28429

Only 10 Minutes
North of
Downtown
Wilmington, NC
by boat or car.
