

Helping Nature Help Us: Co-Benefits of Environmental Solutions

Hunter Freeman
Withers & Ravenel

Hunter Freeman leads sustainable stormwater management projects for Withers and Ravenel. He has fifteen years of stormwater engineering experience. Hunter graduated from Vanderbilt University in 1998 with a Bachelor of Engineering degree with a concentration in Civil and Environmental Engineering. He specializes in permitting and execution of innovative stormwater strategies and controls including green infrastructure and community planning strategies. In addition to his design work, Hunter is President of the North Carolina American Public Works Association Stormwater Division and serves on numerous local and national level stormwater management committees.
